## XF-4000H (PESA)

### Scale & Corrosion Inhibitor

**XF-4000H (PESA)** is a multivariate antiscaling and corrosive inhibitor with non-phosphorus and non-nitrogen, with good antiscaling and dispersion performance to calcium carbonate, calcium sulfate, calcium fluoride and silica scale, with effects better than that of ordinary organophosphates and obvious synergism effects, when built with organophosphates.

<b>Trade Name</b>	XF-4000H (PESA)
<b>Abbreviation</b>	PESA
<b>Chemical Name</b>	Sodium salt of Polyepoxysuccinic Acid
<b>Molecular Formula</b>	HO(C <sub>4</sub> H <sub>2</sub> O <sub>5</sub> M <sub>2</sub> ) <sub>n</sub> H
<b>Commercial Form</b>	Aqueous Solution
<b>Molecular Weight</b>	400-600

### Typical Properties

<b>Appearance</b>	Colorless to amber transparent liquid
<b>Solids content (%)</b>	≥40.0
<b>pH (1% solution) @ 20 °C</b>	10.0-12.0
<b>Specific gravity (20 °C, g/cm<sup>3</sup>)</b>	≥1.30

### Package and Storage:

210L HDPE Drum;1000L IBC(tote);Isotank
